

Environmental Education and Envirothon Training Materials

These are resources I would have loved to have had when I taught and coached academic teams. Now I have time to combine my joy of photography and knowledge of what I would have found useful to put together these materials.

Tree Identification Training Sheets: Sheets showing the leaves, bark, fruit, Fall color, and shape of 20 species of trees. Information is also provided on wildlife species that feed upon the tree or its fruits, wood characteristics and uses, tree size, and other details. All information is provided on one sheet, large enough to use with a small group, preventing the need to flip to multiple pages in a reference book.

Set 1 – 20 of N.C. and the Eastern U.S. most common trees (includes the 19 trees listed for N.C. middle school Envirothon teams).

Set 2 – 20 additional trees common to N.C. and the Eastern U.S. (a work still in progress – ready in early Nov.)

Leaf / Tree Identification Flash Card Sets:

Set 1 – Leaves from the 20 species of trees in set one above.

Set 2 - Leaves from the 20 species of trees in set two above. (available in Nov.)

Set 3 - Leaves from the 20 species of trees in set one above in their Autumn colors.

Aquatic Plants Flash Card Sets

Set 1 – 24 of the more common aquatic emergent, submerged, floating leaf, and floating plants.

Set 2 – A more advanced set containing 24 additional species of common aquatic plants.

Aquatic Macroinvertebrate Flash Card Set

A set of 24 species of macroinvertebrates.

Q: Identify the three organisms shown here (two non-vascular plants and a protist).
 A: Moss, Liverwort, Diatoms (brownish coating on the rock which makes the rocks slippery).

(adult form of larva)
 non-vascular
 moss in the...

Multi-task Environmental Flash Card Set

A set of cards that asks students to identify multiple factors in the environment pictured. These cards have the questions and answers provided.

Also in progress is a leaf lab (classroom set). Students identify leaves as angiosperm or gymnosperm; edges (margins); tips; bases; shape; type (simple or compound); and venation.

The lab includes:

6 sets of leaf cards (sufficient for a class of 30)

6 reference sheets

Lab sheets (for unlimited duplication by the purchasing teacher)
